

# Piotr Tomczak

Frontend Developer

## Summary

- Frontend Developer with over 6 years of experience, specializing in the development of modern and efficient web applications. I have extensive experience in delivering projects for clients across various industries, ranging from video conferencing booking systems to yacht parking reservation systems. I work effectively with teams and clients, leading projects from the conceptual phase to implementation, which demonstrates my ability to work in dynamic and ever-changing project environments.

## Work History

2024-12  
- 2025-02

### ● Freelancer - Frontend Developer

*Guldier sp. z o.o., Rzeszów*

- Rebuilding and optimizing the panel's HTML structure
- Updating libraries and improving the application's performance
- Integrating with the Django backend
- Changing and refactoring the website's appearance according to the Figma design
- Adding a responsive (RWD) version of the application

2021-01  
- 2024-12

### ● Freelancer - Frontend Developer

*Marinehub sp. z o.o., Białystok*

- Creation and support of a boat mooring application
- Developing features for both the web and mobile versions
- Collaborating with the backend team and graphic designers to implement new features and improve the overall look and UX
- Manual testing of the application

2018-03  
- 2024-02

### ● Frontend Developer

*Solvee Studio sp. z o.o., Warsaw*

- Developing client applications from scratch for courier, booking, and navigation services, as well as an application for the Polish Judo Association to manage and organize training plans and calendars.

2018-03  
- 2018-03

● **Training in Angular 4 – Building Modern and Efficient Web Applications.**

*Sages*

2008  
- 2013-12

● **Bachelor's Degree.**

*Wyższa Szkoła Mazowiecka in Warsaw*

**Projects**

2024-12  
- 2025-02

● **Frontend Developer**

*TC Manager - Internal panel for managing aerial units*

**Scope:** Refactoring of HTML structure, performance optimisation, libraries update, Django backend integration. Visual improvements and changes basing on Figma layout.

**Technologies:** Django template, Bootstrap 5.3.3, Select2, JQuery

2023-05  
- 2024-12

● **Reservation Spot - Reservation system**

*Frontend Developer*

**Scope:** Creating reservation forms for restaurateurs and customers.

**Technologies:** React 18.3, Formik 2.4.6, RxJS 7.8.1, TypeScript 4.9.5, Yup 1.4

**Languages**

English - B2

Proficient in utilizing technical documentation and engaging in discussions with clients.

Italian - A1

Polish - C2

Native

2023-04  
- 2024-08

● **PaliPali - Courier application**

*Frontend Developer*

**Scope:** An application enabling the management of courier fleets, orders, and payments. It includes courier tracking, creating and managing orders, vehicles, and employees.

**Technologies:** React 18, Leaflet 1.9.4, Formik 2.2, Bootstrap 5.2.3, ApexCharts 3.37, Typescript 4.9.5, Redux 4.2.1, Yup 1.2

2022-07  
- 2023-08

● **MarineHub - An application for marina owners**

*Frontend Developer*

**Scope:** Management of parking spots in ports. Marking locations on maritime maps, setting prices, editing berth reservations. Managing boat fleets and communication with vessels at sea.

**Technologies:** React 17, Leaflet 1.8.0, I18Next 21, Bootstrap 5.1, ApexCharts 3.33, RSuite 5.6.1, TypeScript 4.5, RxJS 7.3, Redux 4

2022-03  
- 2022-06

● **Boatsman Web - A navigation application for boat owners**

*Frontend Developer*

**Scope:** User interface and navigation functionalities. Fleet management and communication with skippers.

**Technologies:** React 17, Bootstrap 4.4.1, Formik 2.2.9, i18next 20.4.0, TypeScript 4.1.2, Yup 0.32, Leaflet 1.7.1

2022-07  
- 2022-11

● **JobHunter - A portal for companies seeking specialists**

*Frontend Developer*

**Scope:** A recruitment panel for companies seeking foreign specialists.

**Technologies:** React 17, I18next 21, Bootstrap 5.1, ApexCharts 3.33, RSuite 5.6.1, TypeScript 4.5.5

2021-08  
- 2022-07

● **Educat - An application for tutors and students**

*Frontend Developer*

**Scope:** Mentor, Admin, and Applicant Panels. Scheduling tutoring sessions, conducting online tutoring via video conferencing. Managing mentors' schedules, setting prices, availability, and qualifications. Mentor-student communication system through chat.

**Technologies:** React 17, i18next 20.3, RxJS 7.1.0, TypeScript 4.3.4, RSuite 5.2.1, React Router 5.2.0, Bootstrap 5

2021-08  
- 2022-08

● **Judo App - An application for coaches of the Polish Judo Association**

*Frontend Developer*

**Scope:** Creating training plans, monitoring athletes' progress, and adding events. Generating performance charts, marking Judo events and competitions – preparation and progress tracked in tables and charts.

**Technologies:** React 16, Bootstrap 4.4, Konva 7.1.3, I18Next 18, Redux 4, RSuite 4.8.4, TypeScript 3.8.3

2021-07  
- 2022-07

● **MediTrip - An application for scheduling medical consultations abroad**

*Frontend Developer*

**Scope:** Panels for clinics, patients, and specialists. Managing doctors' schedules, booking video calls, and online consultations.  
**Technologies:** React 16, Bootstrap 4.4.1, i18next 18, RSuite 4.7.5, Redux 4.0.5, TypeScript 3.8.3

2020-02  
- 2022-03

● **Glatz - An online store for garden umbrellas**

*Frontend Developer*

**Scope:** Customer panel with umbrella configurators and a gallery of models. The umbrella configurator allows the selection of fabrics, bases, and models.

**Technologies:** Twig, Bootstrap Theme (Sylus Shop Bundle), Docker, Owl Carousel

2018-11  
- 2020-01

● **Wholesaler-Panel - courier application**

*Frontend Developer*

**Scope:** Work on the design of the ordering, courier, and customer panels. Managing the vehicle fleet, creating orders with backend-calculated travel time, and tracking couriers on the map.

**Technologies:** Angular 7, Bootstrap 4.2, Typescript 3.3.1, Google Maps 3.3

2018-02  
- 2018-05

● **Customer Needs Wheel Panel – Generali**

*Junior Frontend Developer*

**Scope:** Client Panel structure and view

**Technologies:** Twig, Bootstrap 4.0, Docker

2018-02  
- 2018-03

● **Investia Wallet - Landing page for ICO**

*Junior Frontend Developer*

**Scope:** A payment processing website for tokens with a login panel.

**Technologies:** Docker, Bootstrap 4.0, Twig

2017-12  
- 2018-09

● **BabyBoxClub - subscription application**

*Junior Frontend Developer*

**Scope:** A diaper delivery subscription service. Created the homepage for the store, integrated with the subscription system.

**Technologies:** Twig, Bootstrap 4

2017-11  
- 2017-12

● **ShopGoShop - Online shopping app**

*Junior Frontend Developer*

**Scope:** Customer Panel – Client Needs Wizard: Collecting financial data through a multi-step quiz.

**Technologies:** Angular 4, Ionic-Native 4.4, TypeScript 2.4.2, RxJS 5.5.2
